

Identifying, promoting, building  
and maintaining resilience in  
health service provision

Sarah Cowley

King's College London

ANNE GEDDES

# Health Visiting

- Situation and process
  - Resources for health
  - Internal and external
  - Active and passive
  - Lay and professional

# A Secure Base from which to Explore

# Salutogenesis

- Terminology:
  - Risk and problems
- Positive development
  - Components + process
- Self-efficacy
- Self empowerment
  - Partnership working
  - Strengths based practice
  - Relationship-centred vs problem centred

# Measurement

- Social capital
  - Processes and critical junctures
- Needs assessment
  - Ideals, types and timing
- Wound care
  - Indicators:
    - hierarchies, quiz, components
    - consensus

# Resilience

- Place for the 'ordinary' and normalisation
  - Is resilience a process?
  - Variability
  - Personal/subjective
  - Implications for measurement
- HM Treasury interest
- Civic society and place of professionals
